

Shower chair / Bedside Commode or Toilet Seat

It is very difficult for patients with ALS to get in and out of the shower without possibility of falling and injuring themselves. The shower chair plays an important role in preventing injuries.

Bench with commode

Slider

Mobile shower chair

Tilt in space shower chair

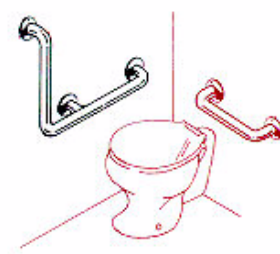

Equipment to increase safety and independence in the bathroom

Raised Toilet Seat

Bedside Commode

Grab bars

Grab bars

Hospital beds and mattresses

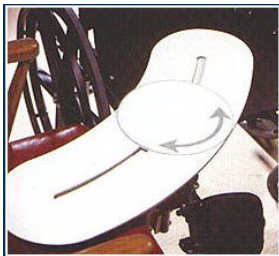

A hospital bed not only provides the patient with security by means of the side rails, but more important allows the patient or the caregiver to power-adjust to head and feet position. The side rails aid the patient with position changes and prevent falls. Different mattresses are available to give patient's comfort and as a preventive measure for pressure sores.

Overhead Trapeze

Transfer board

A transfer board is of great help for patients with limited mobility because the patient can slide safely from bed to chair, bed to bath, etc.

BEasy Slider Board

Standard Transfer Board
